FOOD SAFETY POLICY

Barut Hemera is committed to developing and implementing a food safety management system in accordance with the ISO 22000 Standard. The primary objective of our commitment is to ensure the safety of all food products received, processed, and served within our facility in line with National and International Food Regulations and the Food Safety Management System, thereby ensuring the satisfaction of both employees and customers and meeting their needs.

In this regard, the core principles of our facility are:

- Identifying, evaluating, and controlling all food safety hazards throughout the entire chain of food supply, production, and service until the product reaches the customer,
- Complying with National and International Food Safety Regulations,
- Establishing internal and external communication regarding food safety,
- Shaping the services we provide by evaluating the needs and expectations of relevant parties,
- Organizing training programs that raise awareness among our employees on food safety,
- Continuously carrying out improvement activities for our Food Safety Management System.

Our facility's Top Management commits to providing the necessary resources to ensure the implementation of the food safety management system.

All facility employees are responsible for knowing, understanding, and supporting the Food Safety Policy and the facility's objectives. They are also obligated to follow and implement all food safety procedures and instructions throughout all stages of processes within the facility.

The facility management ensures that all employees have access to food safety documentation.

To verify that our objectives are being met, our facility measures and analyzes performance levels using defined operational criteria such as product safety, customer satisfaction, and supplier verification.

Our Food Safety Policy and objectives are reviewed annually as part of the management system requirements to ensure the continuity of food safety.

We hereby commit to this policy...
